REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The prior art fails to teach the claimed integrated motor propulsor comprising, inter alia, a plurality of outboard blades extending radially from a duct circumferentially disposed about an outer ring. Cho et al. (US '273) is an example of the prior art and includes a duct (shroud) 30 disposed about an outer ring (circular band) 56 in contact with plural rotor blades 46 (Figs.1&3). However, there are no outboard blades extending radially from the duct 30. Wham et al. (US '345) teaches radially extending blades 18 attached to a hub 20; however, there is no motivation to modify Cho's duct with this structure since the hub 20 of Wham rotates and is not stationary as is the duct 30 of Cho. If a modification were possible, the structure of Wham would be applied to the rotor hub 40 and blades 46 of Cho.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
